**Subject:** Thurman Flats Reconstruction on the San Bernardino National Forest  
Contract No. AG-9A14-C-08-0022

**To:** RMA Land Construction, Inc.  
3061 E. La Palma Ave.  
Anaheim, CA 92806

Mr. Steve Mohammad,

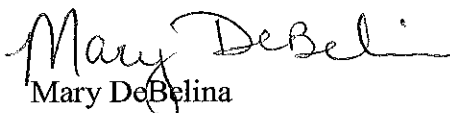

I would like to take this opportunity to congratulate RMA Land Construction, Inc., on successfully completing the Thurman Flats Picnic Area Reconstruction on the San Bernardino National Forest. The reconstruction work was performed to a high standard and has played a significant role in improving the overall appearance of the National Forest.

I would specifically like to commend Project Manager Randy Muir, and Superintendent Jon Talamates, for their dedication and commitment. The work ethic, professionalism, and attention to detail to which they displayed daily significantly contributed to the success of this project. They worked with us to meet time constraints associated with endangered species and limited operating periods.

Randy and JT's professionalism and attention to detail was seen with their commitment to deliver the highest quality project. While completing this project, both Randy and Jon noticed two informational signs, located just off the parking lot and which were not included in the scope of work, yet were badly damaged by weather and graffiti. RMA included the refurbishment of these signs at no cost to the government, in order to provide the National Forest a completely reconstructed Thurman Flats picnic area. Visitors now have the enjoyment and access to all new picnic facilities, including informational signs explaining local wildlife and plant life.

Prime Contractors like RMA, staffed with exceptional site management like Randy and JT, are a pleasure to work with. I will gladly recommend RMA Land Construction for future projects. I hope that we will have the opportunity to work together in the future on another project on the San Bernardino National Forest.

Sincerely,

  
Mary DeBelina

COR-Forest Engineer, San Bernardino National Forest
