RMA Goes International at Andersen AFB, Guam

Anaheim, Calif. (Mar. 23) - **RMA Land Construction, Inc., (RMA)** was awarded a task order under NAVFAC's Small Business Global MACC (SBGMAC) contract for the Interim Landfill Expansion at Andersen AFB, Guam. There were four (4) proposals received and RMA was the lowest price with the highest rated technical, providing the government the Best Value for this procurement. The project includes the development of a lateral expansion of the active landfill by 5,084 square meters. The purpose of the lateral expansion is to provide sufficient disposal capacity within the landfill to accommodate the needs of Andersen AFB until the completion of the new Guam Department of Public Works (DPW) landfill in 2011.

RMA Land Construction, Inc. is a design-build general contractor with 28 years of proven experience on various projects for the Federal government and Department of Defense (DoD) clients. RMA provides design-build management for a multitude of projects in globally diverse locations, including new vertical construction and renovation of administrative buildings, military barracks, hospitals, fitness centers, maintenance facilities and special ops facilities; high and low voltage electrical distribution; heavy and civil/horizontal construction; and maintenance and support services.
