RMA Wins Traffic Mitigation Measures Gates 3 and 4 in a New Region

Anaheim, Calif. (April 27) - **RMA Land Construction, Inc., (RMA)** was awarded a \$5.1-million task order on our Small Business Global MACC IDIQ contract. The task order is for Traffic Mitigation Measures at Gates 3 and 4 at the National Naval Medical Center (NNMC) in Bethesda, Maryland. This task order is RMA's first in the Washington DC region and second award under the SBGMAC. As part of BRAC 2011, the intent of the project is to provide automated Entry Control Facilities (ECFs) at Gates 3 & 4 at the Walter Reed National Military Medical Center, Bethesda, MD. The ECFs will serve the Walter Reed National Military Medical Center as secondary entry gates. The project is scheduled to be completed in December of 2012.

RMA Land Construction, Inc. is a design-build general contractor with 30 years of proven experience on various projects for the Federal government and Department of Defense (DoD) clients. RMA provides design-build management for a multitude of projects in globally diverse locations, including new vertical construction and renovation of administrative buildings, military barracks, hospitals, fitness centers, maintenance facilities and special ops facilities; high and low voltage electrical distribution; heavy and civil/horizontal construction; and maintenance and support services.
