RMA Wins Stadium Replacement Project at Fort Hood, Texas From the U.S. Army Corps of Engineers

Anaheim, Calif. (Aug. 10) - **RMA Land Construction, Inc., (RMA)** was awarded a \$15.9 Million design-build task order for the U.S. Army Corps of Engineers, Fort Worth District, under a previously awarded Small Business MATOC. Providing architectural and engineering services on RMA's team is lead design firm, C.H. Guernsey. The project consists of the design and construction of athletic facilities, including football and soccer fields, running track, press box, command and control room, concessions, covered stage, Special Events Complex, parking for personal and recreation vehicles, site work, and utilities at Fort Hood, Texas. This project is partially funded by the American Recovery and Reinvestment Act (ARRA).

The U.S. Army Corps of Engineers may also exercise options to construct additional seating and parking, along with a new four-field softball complex with scoreboards.

RMA Land Construction, Inc. is a design-build general contractor with 29 years of proven experience on various projects for the Federal government and Department of Defense (DoD) clients. RMA provides design-build management for a multitude of projects in globally diverse locations, including new vertical construction and renovation of administrative buildings, military barracks, hospitals, fitness centers, maintenance facilities and special ops facilities; high and low voltage electrical distribution; heavy and civil/horizontal construction; and maintenance and support services.
