**FOR IMMEDIATE RELEASE:** August 19, 2010

### ***Ribbon Cutting for Newly Renovated, Bachelor Enlisted Quarters at Naval Air Station, Fallon, Nevada***

Anaheim, Calif. (Aug. 19) - **RMA Land Construction, Inc., (RMA)** held a Ribbon Cutting ceremony to commemorate the renovation of 100 Bachelor Enlisted Quarters (BEQ), accommodating 200 base personnel at the Naval Air Station (NAS) in Fallon, NV.

RMA provided a complete interior renovation for all dorm rooms, approximately 850 SF each, while integrating sustainable design strategies and features to minimize energy consumption, conserve resources, minimize adverse effects to the environment, and improve occupant productivity, health, and comfort. The BEQs remained occupied and all construction activities had to be carefully coordinated with the residents. This project's features of work included: new flooring, counter tops, cabinets and shelving; water-saving plumbing fixtures; kitchen and appliances; replacement of all bathroom furnishings including bathtubs, toilets, sinks, and surrounds; and wall and ceiling paint. Additionally, all bedrooms underwent furniture renovation and the kitchens were retrofitted with Energy Star appliance replacements for 20-inch wide cooking ranges, microwaves, and refrigerators.

RMA Land Construction, Inc. is a design-build general contractor with 29 years of proven experience on various projects for the Federal government and Department of Defense (DoD) clients. RMA provides design-build management for a multitude of projects in globally diverse locations, including new vertical construction and renovation of administrative buildings, military barracks, hospitals, fitness centers, maintenance facilities and special ops facilities; high and low voltage electrical distribution; heavy and civil/horizontal construction; and maintenance and support services.
