RMA Earns NAVFAC STAR Award for Excellence in Safety for the Flight Line Security Fence Upgrade, Marine Corps Air Station, Yuma, AZ

Anaheim, Calif. (July 1) - **RMA Land Construction, Inc., (RMA)** was presented the Naval Facilities Engineering Command (NAVFAC) Safety Through Awards and Recognition (STAR) incentive program award by the ROICC Yuma, AZ. The award recognized RMA for a proactive safety approach in protecting field personnel and subcontractors on the Flight Line Security Fence Upgrade project at the Marine Corps Air Station (MCAS). The STAR safety program acknowledges contractors that go above and beyond the minimum safety requirements and demonstrate significant contributions to the Navy's safety program. RMA has a record of zero lost-time incidents on all government projects and currently maintains an EMR of 0.67, well below the national contractor average of 1.00.

RMA Land Construction, Inc. is a design-build general contractor with 29 years of proven experience on various projects for the Federal government and Department of Defense (DoD) clients. RMA provides design-build management for a multitude of projects in globally diverse locations, including new vertical construction and renovation of administrative buildings, military barracks, hospitals, fitness centers, maintenance facilities and special ops facilities; high and low voltage electrical distribution; heavy and civil/horizontal construction; and maintenance and support services.
