### ***RMA Recognized for Outstanding Performance in Hawaii***

Anaheim, Calif. (June 22) - **RMA Land Construction, Inc., (RMA)** earned two Awards of Excellence from the U.S. Army Corps of Engineers, Honolulu District, in recognition of Outstanding Performance for two projects performed under our Hawaii MATOC. Both the Process Control Chemistry Laboratory at the Sand Island Wastewater Treatment Plant, Oahu, HI and the Kaunalapau Harbor Wall and Project Sign at Lanai, HI were completed ahead of schedule and with zero lost-time safety incidents.

The Corps commended RMA's project management teams for their "heavy emphasis on maintaining a superior safety program," partnering approach and engagement with the customer.

RMA Land Construction, Inc. is a design-build general contractor with 29 years of proven experience on various projects for the Federal government and Department of Defense (DoD) clients. RMA provides design-build management for a multitude of projects in globally diverse locations, including new vertical construction and renovation of administrative buildings, military barracks, hospitals, fitness centers, maintenance facilities and special ops facilities; high and low voltage electrical distribution; heavy and civil/horizontal construction; and maintenance and support services.
